[Statement:] Now please imagine that a candidate who has made the pledge is elected. Imagine that much of the time they vote consistent with the majority views of their constituents. But, then imagine sometimes on a key vote they vote contrary to the majority views of their constituents and also contrary to your own views. Here are some ways people might feel in this situation. For each one, please select how much it is the way you would likely feel?

Q28a. I would feel angry with my representative.
